

OR FILL THE OPENING WITH A SCREEN To DE-BUG

HAND-HELD, HAND-INSTALLED, FRAMED FLEXSCREEN-STATIONARY

Brush Seal along frame edges. Spring latch holds the screen securely in place

FlexScreen-Stationary portable framed screen keeps out pests on loading dock openings where limited or no access is needed, and it lets in light and fresh air!

Vinyl encapsulated woven polyester mesh on a tubular aluminum frame snaps into loading dock openings between the door jamb. Keep out pests, improve security and provide more ventilation and sunlight for employee comfort and productivity.

Quick Notes:

Quality

- 1 inch aluminum tubular frame with crossmember stiffeners for stability and durability
- Brush around the outside of frame seals around the edges even on non-square openings. Hem pocket at the bottom adapts for uneven floor
- Sturdy spring pin locks (4) hold the frame in the jamb

Practicality

- Keeps out insects & birds, reduces dust & wind, improves sanitation
- Lets in fresh air and light
- Improves employee comfort and productivity
- Economical to buy and maintain
- Easy to install
- Increases security — a visual and physical barrier to reduce theft & pilferage
- Can be custom ordered to fit almost any opening
